

## Contents of Volume 1

### Keynote Paper

- Cartography : a milestone and its future 1  
Joel Morrison

### Overview of National Topographic Mapping

- Digital mapping at Ordnance Survey 13  
P. McMaster, P. E. Haywood and M. Sowton
- Digital map information in Japan 25  
Yamato Miyazaki, Koichi Tsukahara and Yoshihisa Hoshino
- Geographic information system developments within the 33  
U.S. Geological Survey  
David A. Nystrom
- Digital mapping at the Istituto Geografico 43  
Militare Italiano  
Luciano Surace

### System Developments

- Computer assisted cartographic three-dimensional 53  
imaging techniques  
Menno J. Kraak
- Deriving and using an object based model of a mapped 59  
area from a feature coded representation  
J. M. P. Quinn
- FINGIS - software and data manipulation 69  
Tapio Keisteri
- The GEOLINK system, interfacing large systems 76  
T. C. Waugh and R. G. Healey

## Classification and Coding of Features

Automatic structuring and feature recognition for large scale digital mapping Mark De Simone	86
The encoding of cartographic objects using HBDS concepts Michael A. Domaratz and Harold Moellering	96
The system of classification of map data for digital map Yoshihisa Hoshino and Kazuo Inaba	106
Attribute coding scheme : identification of features in the U.S. Census Bureau's TIGER system Timothy F. Trainor	117

## Data Selection and Extraction

Hybrid use of hashing techniques for spatial data Wayne A. Davis	127
Intersecting layers of information - a computerized solution Y. Doytsher and B. Shmutter	136
Parallel search in spatial data distribution Mark L. Palmer	146
Extraction of area topology from line geometry M. Visvalingam, P. Wade and G. H. Kirby	156

## Cartographic Analysis, Design and Display

A workstation for handling located data : PISTIL Antoine Bernard and Daniel Piquet-Pellorce	166
From non-data to high resolution map information Avi Degani	175
The philosophy and requirements of computer-aided graphic design in cartography Rupert Essinger	189
Visual impact analysis : a case study of a computer based system W. M. Turnbull, T. W. Maver and I. Gourlay	197

## Field Survey Data Capture

Land survey databases in opencast coal mining J. A. Kidd and N. Lovatt	207
Computerisation of overhead line survey and design in the electrical supply industry R. J. Potter	217
The capture of survey data D. W. Proctor	227
Collection of digital data by the field surveyor Alan T. Wild	237

## Rasters and Vectors

Cartographic models for digital topographic maps F. Christ	247
The integration of cartographic data stored in raster and vector formats B. J. Devereux	257
Raster techniques in geological map production K. Mennim	267
A method to compress raster map data files for storage Benshan Wang	272

## Transfer Standards I

An international perspective on the development of national digital cartographic standards R. B. Southard	282
Exchanging digital base mapping data R. Laurence Simpson and Ray Moore	292
National standards for the transfer of digital map data M. Sowton and P. Haywood	298
Developing digital cartographic data standards for the United States Harold Moellering	312
Data standardization of the integrated LIS in Finland Matti Vahala	323

## Transfer Standards II

- Data transfer between GIS in Canada: a review of the problem and examples of current solutions from Atlantic Canada  
Robert V. Maher 333
- Digital cartographic data feature standards in the United States  
Robert D. Rugg and Warren E. Schmidt 340
- Obtaining information on quality of digital data  
Nicholas R. Chrisman 350
- The development of a data model and national standards for the exchange of digital topographic data  
M. M. Allam 359
- Quality control and standards for a national digital cartographic database  
Francis J. Beck and Randle W. Olsen 372
- Data quality - a management philosophy  
G. M. Kennedy-Smith 381
- MDIF - A standard for communication of digital map data over public data communication systems  
Z. A. Jiwani 391

## Data Bases

- Mapping from a topologically encoded data base: The U.S. Bureau of the Census example  
Frederick R Broome 402
- Digital cartographic data bases: advanced analysis and display technologies  
Marshall B. Faintich 412
- The design of a spatial database management system  
Qiming Chen 423
- The I.G.N. small scale geographical data base - (1:100000 to 1:500000)  
Francois Salge and Daniel Piquet-Pellorce 433

## Digital Elevation Models

The multi-disciplinary applications of DEMS D. R. Catlow	447
Accuracy assessment of digital terrain models R. G. Ley	455
A PC-based editor for digital elevation models Anders Ostman	465
Quadtree representations of digital terrain Zi-Tan Chen and Waldo R. Tobler	475

## Data Structures

Hierarchical grid structures for static geographic data bases Andreas Kleiner and Kurt E. Brassel	485
Digital definitions of scale-dependent line structure Barbara Pfeil Buttenfield	497
Regional land information system development using relational databases and geographic information systems Laurence W. Carstensen Jr.	507
The use of quadtrees in geographic information systems and spatial data handling David M. Mark	517

## Remote Sensing and Photogrammetry

Landsat and SPOT high resolution satellite images : a new component for geographic data bases J. Denegre, J. C. Deschamps and B. Galtier	527
Real-time photogrammetric input versus digitised maps : accuracy, timeliness and cost Ian Dowman and Jan-Peter Muller	538
Remote sensing of power station thermal discharges I. R. Rodgers	544
Digital landuse classification in Himalayan region from remotely sensed data K. P. Sharma and P. K. Garg	555

Towards Expert Systems

Interfacing cartographic knowledge structures and robotics F. Bouille	563
Archaic data models or hardware as a concept killer Jean-Phillipe Grelot	572
Towards a cartographic expert system W. A. Mackaness, P. F. Fisher and G. G. Wilkinson`	578
A rule-based approach for spatial object modelling and task management Qiming Chen	588
